Rules currently in force

- **£1 = 1 point** on all qualifying items — including sale, discounted and promotional
- Points stay **pending for 30 days** before becoming available
- **100 points = £5** voucher value, rounded down
- Redemption capped at **£50 per order**, in £5 increments
- Voucher spend must be **less than the basket value**
- **£10** birthday reward, once per year
- Points expire **6 months** after earning
- Vouchers expire **6 months** after issue

Changed only from Settings → Rules, by an authorised role, and logged.

Redemption controls

- **Minimum basket spend** before a voucher can be used
- **Maximum £50 per order** (configurable)
- Redeemable amount **rounded down to £5**
- Voucher spend must stay **below the basket total**
- **Excluded products** reduce the eligible portion
- Same rules apply **online and at POS**

Earning now applies to all qualifying items. Exclusions apply to **redemption**, not earning.

Create, monitor, cancel and reissue vouchers, filtered by status, expiry window or member.

How the redemption cap is calculated

- Basket total £100
- Eligible products £60
- Excluded products £40
- Member's available voucher value £50

Redeemable: £55 → capped at £50.

The cap is calculated against the £60 eligible portion, then the £50 per-order maximum applies, rounded down to £5. Voucher spend must remain below the basket total. Unused value stays on the account.

Business-rule assumption per proposal v1.1 — final behaviour confirmed at technical specification.

09 Aug 2026	£10 voucher used	Online	
12 Sep 2025	Birthday reward added	—	
Rewards are shown in pounds. Recent shopping takes about 30 days to turn into a reward. Nothing expires without an email first.			

Shown to the member: available £ value, individual vouchers, expiry dates, birthday reward.

Held in the backend only: points balance, pending points, points to next £5, ledger entries.

The reward is applied in £5 steps at Shopify checkout, validated against the minimum spend, the £50 cap and the eligible basket portion before the order is placed.

Order summary

Japanese acer 'Bloodgood'	£42.00
1 × £42.00 · earns points	
Terracotta pot, 30cm	£18.00
1 × £18.00 · earns points	
Bulb collection	£12.00
1 × £12.00 · sale item — still earns	
Privilege Club reward	-£10.00
2 × £5 increments	
Subtotal	£62.00
Delivery	£4.95
Total	£66.95

You'll earn 72 points on this order — sale items included. They become a reward you can spend about 30 days after delivery.

How to read this document. These are illustrative structure screens, produced to agree layout, navigation and field-level content before design begins. Visual styling, OSC brand treatment and final wording will be applied at the design stage. Every screen carries the proposal module number it delivers, so this pack can be reviewed alongside the Scope of Work.

What changed in v1.1, following Proposal v1.1 (14 Aug):

1. **Email is now the primary customer identifier;** postcode is a supporting field for lookup and duplicate validation. Search order, enrolment forms, duplicate checks and migration matching all reflect this.
2. **Points are earned on all qualifying items,** including sale, discounted and promotional lines. The previous full-price-only qualification logic has been removed throughout.
3. **New: 30-day pending period.** Earned points are held pending before becoming available or triggering any customer communication. Visible in admin balances, the ledger, the POS member view and the Klaviyo triggers.
4. **Redemption is now value-based, not voucher-based at POS.** Staff choose an amount in £5 increments, capped at £50 per order, above the minimum basket spend and below the basket total, with excluded products reducing the eligible portion.
5. **Rules engine extended** with minimum basket spend, per-order cap, increment, eligible/excluded items, and separate online and POS redemption switches.
6. **Reports extended** with channel, store, staff and gender filters, loyalty activity as a percentage of total sales by revenue and order count, and month-on-month / year-on-year comparison.
